

# Radio Science Letters

Reduced Fee Charges for  
URSI General Assembly  
and Scientific Symposium – 2021

Editor: Prof P.L.E. Uslenghi

The 34th General Assembly and Scientific Symposium (GASS) of the International Union of Radio Science (URSI) <http://www.ursi.org> is scheduled for 28 August – 4 September 2021 in Rome, Italy.

The scientific program of the GASS is organized around the ten Commissions of URSI. The main objective of the GASS is to review current trends in radio research, present new discoveries and make plans for future research work. Papers will be presented on all aspects of radio science. URSI is providing an option

for GASS authors to publish short (up to four pages) journal papers based on their GASS papers in a special section of their open-access journal, *Radio Science Letters*.

Note that if you have chosen for your GASS paper to be indexed on IEEE-Xplore, the Radio Science Letters paper must not be a simple copy of the GASS paper, but must incorporate substantive extensions. If you have submitted an extended abstract to the GASS (which will not be indexed by IEEE-Xplore) then there is no such requirement.

**Full length journal papers based on GASS papers, may be submitted to the AGU journal Radio Science at <https://www.radioscience.agu.org>**

**Submissions must be sent to <https://www.editorialmanager.com/RSL>**

**Do you want to publish a short paper (up to 4-pages) based on your URSI 2021 General Assembly paper in URSI's journal, Radio Science Letters?**

**Submission opens:  
1 April 2021**

**Submission closes:  
31 December 2021**

**For information and templates, visit the publications page on the URSI website <http://www.ursi.org>**
