

Dear Sirs,

The XXXIV General Assembly and Scientific Symposium (GASS, <https://www.ursi2021.org/>) of the International Union of Radio Science (Union Radio Scientifique Internationale - URSI) will be held at Sapienza University of Rome, Faculty of Civil and Industrial Engineering, from August 28 to September 4, 2021. It will be a *hybrid event* (permitting both on-site and on-line attendance) to overcome the difficulties posed by the COVID19 pandemic.

The possibility of on-site and online participation stimulated a huge participation of the radio science community from all over the world: more than 1700 *submissions* have been received for presentation. The Organizing Committee of the XXXIV URSI General Assembly and Scientific Symposium (GASS) is glad to offer opportunity for *sponsorship*. Companies and their activities will be advertised and presented both at the *physical and virtual venue of the conference*.

URSI (Union Radio-Scientifique Internationale, International Union of Radio Science) is the world's premier association related to radio science. The URSI GASS is the most important flagship conference organized every three years, and its first edition dates back to almost one century ago (1922).

Research areas related to radio science and their impact on modern technology are well-consolidated within URSI and in constant progress. Outstanding examples of interest for many institutions and industries involve radiofrequency and microwave communications, antennas, remote sensing applications, electromagnetic compatibility, measurements, radio astronomy, quantum electronics up to bio-medical applications.

The main theme of the GASS 2021 will be focusing on the '100 years of Radio Science', with movies, and panels, all in reference with the progress of radio science and the related applications. In conjunction with the centenary celebrations of URSI, about 1500 participants from all over the world (both on site and online according to their choices) will take part in the URSI event and it is expected that GASS 2021 will enjoy a great success.

It will be certainly a very appealing showcase for the *Companies and Institutions* attending this event.

Several possible solutions for the *active participation of Companies* in this event are available, by means of *different levels of sponsorship* (platinum, gold, silver, bronze) and specific *à-la-carte* support services.

A *detailed list* of the offered *sponsor opportunities* and the *reservation form* can also be found on the *website*: <https://www.ursi2021.org/sponsors-exhibition/> (the list is attached here too for convenience).

In case of acceptance, the Companies would benefit of proper exposure and visibility (*on-site and online*), and will also be announced with their logo among the conference sponsors in the various information material, through the website and the virtual venue of GASS 2021.

Thanking for the attention and looking forward to meeting you for the event, with best regards,

*The URSI GASS 2021 Organizing Committee Chair: Prof. Guglielmo d'Inzeo*

*The President of the Italian National Committee of URSI: Prof. Carlo Carobbi*
